Lea,

See attached for lab results in the past 2 years.

Included is a summary document that explains the samples taken.

Please let me know if you have any further questions.

Dear Mr. Helmer,

We are making a public records request for the results of sampling done in the field over the past two years that examined levels of radioactivity in drill muds, cuttings and fluids. We understand it is not a large amount of sample data and thank you in advance for your time and effort to provide this information on these materials.

Best regards,

Lea Harper
