**RE: Application to Operate a Facility
E & R Energy Services, LLC
Muskingum County**

Dear Mr. Eltringham:

The Division of Oil and Gas Resource Management (DOGRM) received the revised drawings and application documents on October 14, 2014 and visited the site on October 17, 2014. Observations made during the site visit suggest that construction is not complete and assume that the items identified below will be performed during final site work.

- The modified drawings more closely reflect the site construction, but the grading contours on the plans do not match the existing grading. It does not appear that final grading has been completed.
- The access road is not constructed in accordance with the aggregate pavement profile on page two of the drawings. It appears that an "out-of-spec" concrete is being used to top the road surface.
- The BMPs and erosion control details have not been implemented at the site. This was discussed in a previous phone conversation with Mr. Linn. The vegetative stabilization, silt fencing, sediment pond and other controls defined on the submitted documents need to be installed immediately.
- The boundary of this facility needs to be clearly defined and submitted to the Division upon completion of the site grading and stabilization.

We are forwarding the application to the legal section with the recommendation to process the order to operate a facility with conditions that include implementation of the erosion and sediment control BMPs as identified in the application and identification of the limits of the facility boundary upon completion of construction. Please contact me at 614/265-6905 and/or by email at beth.pratt@dnr.state.oh.us with any questions.

Sincerely,

A handwritten signature in black ink that reads "Beth A. Pratt". The signature is fluid and cursive.

Beth A. Pratt, P.E.
DOGRM Engineer

C: Tim Linn, P.E., Linn Engineering, Inc.
Rocky King, Regional Supervisor, DOGRM
Blake Arthur, P.E., DOGRM Engineer
