

A photograph of three people (two men and one woman) standing by a stream in a wooded area with autumn foliage. One man is holding a handheld electronic device, and the woman is holding a small white bottle and a color calibration chart. A large, stylized blue water splash graphic is on the left side of the image.

WANTED:

Water Watchers

Have you noticed a change in your water or in the streams or reservoirs nearby?

Have you experienced a rash or other health effects from bathing or swimming?

Does your water look, taste or smell differently?

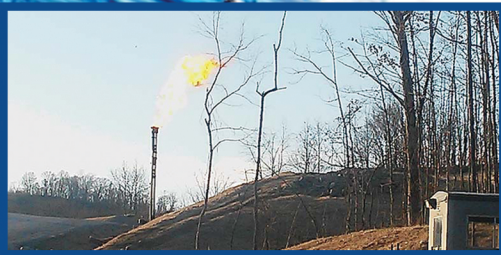

Do you wonder what your water quality is?

Do you want to participate in regular sampling to monitor water quality?

We want to keep our water
Drinkable
Fishable
Swimmable

But fracking can pollute water - turning billions of gallons of freshwater into toxic, radioactive waste.
